S Fayaz Ahamed

REACT-JS DEVELOPER

ABOUTME

Highly skilled 2+ years experienced React.js specialist with a track record of excelling in the development of state-of-the-art web applications. Proficient in leveraging React.js to create engaging, adaptable, and top-performing user interfaces. Demonstrated ability to collaborate effectively with diverse teams and clients to deliver groundbreaking web solutions that leave a lasting impression.

EXPERIENCES

Ascend Avenue solutions Pvt Ltd Jan 2022 to Present

- Responsible for developing and maintaining web applications utilizing React, Vue, and JavaScript, focusing on meeting project requirements and delivering exceptional user experiences.
- Proficiently managed application state by effectively utilizing tools like Redux, Redux Toolkit, Thunk, and Saga, resulting in streamlined data management and a seamless application flow.
- Implemented responsive design strategies, optimized performance, and ensured cross-device compatibility to guarantee a consistent user experience across various platforms and screen sizes.
- Diligently authored clean and highly optimized code to enhance application performance and facilitate ease of maintenance, consistently upholding codebase quality standards.
- Demonstrated exceptional problem-solving abilities by adeptly identifying, troubleshooting, and resolving intricate issues, safeguarding the robust functionality of web applications.
- Played a pivotal role in designing and integrating RESTful APIs, facilitating efficient data exchange between the front and back end while prioritizing data integrity and security.
- Maintained a proactive stance toward continuous learning, remaining abreast of emerging technologies and tools, and actively disseminated knowledge within the team to foster a culture of innovation and professional growth.

EDUCATION

TKR College of Engineering & Technology
B.Tech- 2022

PROFESSIONALSKILLS

- React
- Redux
- ReduxtoolkitVue
- Reduxthunk
- Reduxsaga
- Typescript
- Javascript
- Styledcomponent
- Material-UI
- Bootstrap
- Sass
- Html
- CSS

PROJECTS

Project:TalentLMS

Domain:Multimedia

Role:Web Developer

Project Description:

McGraw Hill Education is a virtual learning platform allowing students to engage in their studies and practice their coursework from any location and at any time that suits their convenience.

Roles and Responsibilities:

- Development and maintenance of a cutting-edge multimedia web application for a prominent client, utilizing the latest technologies.
- Collaborated closely with cross-functional teams to translate project requirements into fully functional features, fostering a seamless integration of diverse perspectives.
- Demonstrated proficiency in managing data flow and state through the adept use of Redux and similar state management solutions, resulting in efficient data handling and stellar application performance.
- Skillfully integrated multimedia elements, encompassing video and audio playback, to elevate the user experience, imbuing it with greater engagement and immersion.
- Enacted robust user authentication and implemented stringent data security measures to safeguard sensitive multimedia content, guaranteeing data privacy and integrity.
- Played an active role in an agile development process, which included sprint planning, consistently achieving project milestones, and effectively meeting deadlines, ensuring project success.

Domain:Mopar Insiders

Domain: E-Commerce

Role: Web Developer

Project Description:

A user-friendly e-commerce platform provides customers a seamless and hassle-free experience when browsing, choosing, and buying various products and services online. Shoppers can explore extensive product catalogues, access in-depth product descriptions, view high-quality images, and conduct secure transactions from their homes.

Roles and Responsibilities:
- Development and continuous enhancement of the Renault e-commerce website, leveraging React.js to deliver a user-centric and captivating experience.
- Effectively implemented Redux to manage state, resulting in seamless data handling and the consistent behavior of the Renault project, thus contributing to its success.
- Demonstrated skill in seamlessly integrating RESTful APIs within the Motors platform, encompassing product listings and robust user authentication, guaranteeing secure data access and reliable transactions.
- Fostered close collaboration with UI/UX designers, transforming design concepts into reality by crafting tailored web components that resonate with the Renault brand.
- Conducted regular code assessments to maintain elevated code quality and adherence to best practices, actively contributing to developing a resilient and dependable codebase for the Renault project.

Declaration:
I am confirming that all the information provided above is accurate to the best of my knowledge.
